SUMMARY

IT professional with 3+ years of combined experience in IT support, technical operations, business systems, and end-user support, including hands-on experience in a manufacturing environment. Currently an IT Officer providing network and infrastructure support to production and office users — troubleshooting hardware, software, and connectivity issues, supporting production IT equipment, managing IT assets, and assisting with ERP-related business applications and IT security/compliance.

Strong background in Windows environments, Microsoft 365, LAN/WAN networking, TCP/IP, switches, routers, VLANs, DNS/DHCP, Active Directory, Group Policy, and VPN/backup procedures. Experienced coordinating with vendors, supporting business applications, and working with cross-functional teams in a fast-paced manufacturing environment. Open to relocating to Riyadh, Saudi Arabia.

CORE SKILLS

IT Support	Hardware/software troubleshooting, Windows 10/11, desktop & laptop deployment, printer/peripheral support, remote support (RDP, UltraViewer, Sunlogin), IT asset management, preventive maintenance
Networking	LAN/WAN, TCP/IP, switches & routers, VLAN configuration, DNS/DHCP, endpoint & network device troubleshooting
Systems & Security	Windows Server (working knowledge), Linux (Ubuntu/CentOS), Active Directory & Group Policy (working knowledge), firewall & access control concepts, VPN, backup & data protection procedures
Business Apps & Data	Epicor ERP implementation support, SSRS/SQL Server Reporting Services, SQL/MySQL, Python (automation, reporting, data visualization), Git
Productivity & Other	Microsoft 365 (Outlook, Word, Excel, PowerPoint), user training & onboarding, technical documentation, vendor coordination

EXPERIENCE

IT Officer – Network & Infrastructure Support *Dec 2024 – Present*

Ventura Leatherware Manufacturing (BD) Ltd. — Uttara EPZ, Nilphamari, Bangladesh

- Provide day-to-day IT support to 500+ production and office users, diagnosing and resolving hardware, software, OS, and connectivity issues.
- Troubleshoot LAN and network connectivity issues, including endpoint connectivity, switches, cabling, and other network problems affecting production operations.
- Install, configure, and maintain Windows-based computers, printers, network devices, and production IT equipment across manufacturing operations.
- Maintain IT asset inventory — equipment allocation, asset status, user assignment, and preventive maintenance records — and perform regular asset health checks to reduce downtime.
- Support network infrastructure involving LAN, TCP/IP, switches, routers, and VLAN-based environments, focused on connectivity and uptime.
- Support business applications and participate in the ongoing Epicor ERP implementation, including requirements gathering, reporting, and SSRS-related data activities.
- Assist with IT security compliance, access control, endpoint security, and organizational IT policy implementation.
- Coordinate with vendors and service providers for IT equipment procurement, maintenance, and technical support.
- Prepare IT budget submissions, asset records, technical documentation, and operational reports; conduct user training on systems and equipment.

- Contribute to IT improvement initiatives focused on reducing paper-based processes and improving digital workflows.

IT Trainer – Digital Entrepreneurship Programme *Oct 2023 – Dec 2024*

Her Power Project, ICT Division, Ministry of ICT, Bangladesh

- Delivered practical training on digital tools, computer applications, platform management, and online business operations to 100+ participants across multiple cohorts.
- Provided hands-on technical guidance and troubleshooting support during live training sessions.
- Prepared training materials and technical documentation tailored for non-technical participants.
- Coordinated with project officers to track participant progress and maintain performance records.
- Achieved an 85%+ post-training assessment pass rate across cohorts.

Business Analyst *Apr 2023 – Sep 2023*

Developer Experience Hub, Bangladesh

- Gathered and documented business and technical requirements for software applications, including functional requirements, process flows, and use cases.
- Coordinated with developers and clients to clarify requirements and resolve functional issues.
- Participated in User Acceptance Testing (UAT), defect tracking, and application rollout; supported user onboarding for business applications.
